Castle Bravo Project
Open Code. Open Defense. Open Future.

1. Executive Summary

This threat intelligence report indicates a high to critical threat level, characterized by a broad and potentially opportunistic campaign. Key indicators reveal extensive domain infrastructure, including legitimate entities like "trumpmobile.com" and "truthsocial.com", linked to a multitude of suspicious IP addresses. Notably, IPs such as 109.94.209.30 and 91.191.184.50 serve as central points for numerous unrelated and potentially malicious domains, suggesting a large-scale command-and-control (C2) or malware distribution network. The presence of "ra2.in" and associated file hashes further points to active malware hosting or exploitation. The sheer volume and diversity of linked indicators strongly imply a significant and active threat targeting a wide range of potential victims or leveraging compromised infrastructure for various malicious purposes. Immediate actions should include blocking all identified malicious domains and IPs at perimeter defenses, proactively hunting for the identified file hashes across endpoints and network shares, and monitoring network traffic for any connections to these indicators.

2. Actionable Recommendations

Here are the specific, actionable recommendations for the next steps in your investigation:

Network Forensics

- * ****Immediate Blocking:**** Immediately implement blocks for `trumpmobile.com` and all its identified subdomains (e.g., `cisionone-email.trumpmobile.com`, `lb.trumpmobile.com`, `health.trumpmobile.com`, `cp.trumpmobile.com`, `cpcalendars.trumpmobile.com`, `webdisk.trumpmobile.com`, `www.trumpmobile.com`, `autodiscover.trumpmobile.com`, `webmail.trumpmobile.com`, `mail.trumpmobile.com`, `cpanel.trumpmobile.com`) at the DNS, proxy, and firewall levels. Also, block IPs 104.26.2.138 and 104.26.3.138 at the firewall.
- * ****Log Review:**** Review DNS logs, proxy logs, and firewall logs for any historical or ongoing connections to `trumpmobile.com` (and its subdomains) or IPs 104.26.2.138, 104.26.3.138. Expand this search to include the IPs 109.94.209.30 and 91.191.184.50 mentioned in the AI analysis.
- * ****Traffic Analysis:**** Analyze network flow data (NetFlow/IPFIX) and packet captures (if available) for traffic patterns, volume, and unusual protocols associated with the identified IPs and domains, looking for C2 beaconing or data exfiltration.

Host-Based Analysis

- * ****Endpoint Scan & Hunt:**** Perform an organization-wide EDR/AV scan and hunt for any connections to `trumpmobile.com` or IPs 104.26.2.138, 104.26.3.138 on all endpoints.
- * ****Malware Hash Identification & Hunt:**** Identify the specific file hashes associated with "ra2.in" mentioned in the AI analysis. Once identified, proactively hunt for these hashes across all endpoints, servers, and network shares.
- * ****Compromised Host Forensics:**** For any hosts identified as having communicated with these indicators, collect volatile data (e.g., running processes, network connections, memory dumps), perform full disk imaging, and conduct in-depth analysis of process execution, registry changes, and file system modifications.

Intelligence & Threat Hunting

- * ****IP Pivoting:**** Pivot on IPs 104.26.2.138 and 104.26.3.138 (and 109.94.209.30, 91.191.184.50 from the AI analysis) in threat intelligence platforms (e.g., VirusTotal, Passive DNS, Shodan) to discover other associated domains, subdomains, or infrastructure linked to the same threat actors.
- * ****Domain WHOIS & SSL Analysis:**** Investigate the WHOIS records for `trumpmobile.com` and `ra2.in` (if possible) to identify registrant details, name servers, or other linked infrastructure. If available, pivot on SSL certificate serial numbers for these domains.
- * ****Broader Campaign Context:**** Research the broader context of the campaign, including the mention of "truthsocial.com" in the AI analysis, to understand if this is a targeted attack, infrastructure reuse, or part of a larger, more complex operation.
- * ****Public Intelligence Search:**** Search for public threat intelligence reports, security advisories, or forum discussions related to `trumpmobile.com`, `ra2.in`, or the identified IPs to uncover known TTPs, malware families, or actor attribution.
